RETURN TO NATURE - HONORED FOREVER

13360 Rose Creek Road, Bozeman, Montana 59715

Quincy OrHai, Executive Director ∞ 406-587-1818 ∞ info@infinitycemetery.com

Infinity Cemetery LLC ∞ Providing an all-natural resting place and an eternal memorial.

Infinity Cemetery LLC is a newly state licensed Natural Green Burial Cemetery located just east of Bozeman, Montana. Infinity Cemetery is organized to provide a limited access, completely natural, wildlands green burial site. Initially focused on the Cremated Remains Green Burials, we also accept Natural (un-embalmed) Green Burials seasonally April – October. We are the only Natural Green Burial cemetery in the state of Montana, and we are bonded and insured. The growing popularity of direct cremation creates over 1.5 million cremains annually in the USA, and many more worldwide. Over 30 million urns of ashes are now being temporarily stored in homes or at improper storage sites nationally. Infinity Cemetery LLC provides Green Burial services for anyone, anywhere, here or abroad, as an ethical alternative to scattering ashes.

Infinity Cemetery is located within a deeded nature preserve on a private ranch in the foothills of the Bridger Mountains, four miles east of Bozeman, Montana. Our first Cremated Remains Green Burial ground is a special 1.4 acre dedicated site, named Calliope Field (for the calliope hummingbird, a colorful summer resident). It is located within a 28 acre nature preserve, on a hillside that includes virgin Douglas-fir forest and aspen woodland. The wooded cemetery site is pristine and has never been developed, logged or otherwise cut or cleared or even driven on. It is totally natural and otherwise undisturbed, and we will maintain it that way. When completed we will use less than 2% of the surface area of the cemetery site for cremated remains Green Burials.

Infinity Cemetery is unusual in several respects. Our service is normally accessed through an Internet portal, infinitycemetery.com. Most cremated remains to be buried with us will be shipped to us from out of state by USPS Priority Mail Express. It is possible to arrange to be buried in close proximity with other family members, friends, companions, associates or even pets.

Our cemetery is focused primarily on burials of cremated remains. We offer only Green Burials, where just the pure ashes are mixed with the native soil and are buried about a foot and a half feet depth, with no containment. This practice ensures the fastest possible incorporation of the remains back into the earth. After burial, all Green Burial Spaces are fully restored to their natural condition, and are essentially invisible and thus completely returned to nature. Stone, metal, concrete or other memorial markers are not allowed, but the exact location of each Green Burial Space is carefully recorded.

In general the burial sites are not easily accessible, as the land is steep and thickly forested, and is kept in a pristine, wild, natural condition with only wildlife trails. Our staff does the actual Cremated Remains Green Burials privately, hand digging or boring the six inch diameter grave. With our Natural Green Burials we hand dig a grave about four feet deep, carefully removing the top layer of plants and the soil in layers, to be returned in the order they were removed. The un-

embalmed body is then gently placed at the bottom of the grave, either in a biodegradable coffin or other approved Green Burial container, or wrapped in a biodegradable shroud.

Upon request, we will accommodate a small, physically fit burial party capable of navigating the steep, mile-high elevation, mountainous terrain and thick vegetation on foot. Return physical access to the general burial site is by appointment only, to preserve the wildlife habitat. A continuous webcam provides constant online access to the cemetery area and the burial sites, and can be linked to the online Memorial Page.

The greatest memorials of a loved one are in the shared memories of love, good times and the good deeds accomplished. As part of all Infinity Cemetery burials, an eternal online Memorial Page - guaranteed by a perpetual trust fund and committed to remaining forever online, despite future technology changes or challenges - is included for all deceased buried at Infinity Cemetery. The Memorial Page is much more than a standard obituary. Besides including names and any relevant personal details about the deceased, such as places and dates of birth and death as well as other desired memorial information, the Memorial Page can include a great deal of text, images, video and sound. This information can be made public or kept private with password access, according to the client's wishes.

Our belief is that a private, family held business based on private land is the best way to guarantee continuity of service from generation to generation. We are committed to the ideas embodied in our motto "Return to Nature - Honored Forever". We are committed to excellence and transparency and honesty in all our business and personal lives. We also believe that everyone deserves to be remembered. Everyone merits a lasting memorial, and the only truly lasting way to accomplish that, and to make the memorial actually accessible to others, now and in the future, is with a virtual memorial page with the financial resources to last forever.

There are no hidden or additional charges. The total cost of a Cremated Remains Green Burial at Infinity Cemetery LLC is \$1854. Natural Green Burial is \$9999. Our natural, dignified and quality final resting place is easily purchased online, and includes the Green Burial Space, the actual burial (opening and closing), with or without a reading or graveside service, an emailed certificate and photograph of the gravesite, and an optional 100 MB permanent online Memorial Page at our website, infinitycemetery.com, which can be linked to our 24/7 HD webcams, to allow you the opportunity for real-time instant online visitation of the actual Green Burial Space and Memorial Page, all easily accomplished anytime, anywhere from any computer, tablet or phone.

Infinity Cemetery LLC Green Burial Service represents a new and modern paradigm in the ancient practice of burying and creating a permanent memorial for the dead. This return to nature is our destiny. Throughout human history we have returned our dead to the cycle of life by respectfully burying them in not-too-deep graves, often marking their burial and the passing of their life with a memorial symbol of some kind. With our Green Burials, natural resources are conserved, land is protected, and 24/7 access to their virtual memorial page conforms to the needs of today's environmentally sensitive, highly mobile bereaved, allowing both recently deceased and many currently stored cremated remains to finally return to nature in a place of peace, harmony and great natural beauty, where they can finally rest in peace, forever.
